The SOAS African Development Forum is an innovative, student-driven platform for championing African development. We aim to promote international interaction, generate lively thought-provoking discussion and challenge assumptions surrounding development in Africa.

'African Social Enterprise: Development From Within' is the theme for the 2015 ADF which is being held on the 14th March 2015 at the Brunei Gallery, SOAS. The goal of the event is to celebrate the successes of social enterprises in Africa, discuss how various movements are inspiring change from place to place trans-regionally and nationally, and to assess the capacity of social enterprise to drive future socio-economic growth for the continent.
