

Programme Specification

I. Programme Details

Programme title	International Management (Korea)			
Final award (<i>exit awards will be made as outlined in the Taught Degree Regulations</i>)	BA	<input type="checkbox"/>	MA	<input type="checkbox"/>
	BSc	<input checked="" type="checkbox"/>	MSc	<input type="checkbox"/>
	Other ...	<input type="checkbox"/>		
Mode of delivery	Distance-learning	<input type="checkbox"/>	On-campus	<input checked="" type="checkbox"/>
Professional body accreditation (<i>if applicable</i>)	n/a			
Academic year this specification was created	2017/18 for 2018/19 onwards			
Dates of any subsequent amendments				

II. Programme Aims: What will the programme allow you to achieve?

<ol style="list-style-type: none"> 1. The programme aims to teach a combination of general management modules with specialist modules on Korean management systems and Korean language modules. It is aimed at students wanting to pursue business careers in Korean organisations or organisations that deal with Korea. 2. The planned syllabus includes general management modules common to most first-degree management programmes; e.g. accounting, marketing, finance, international management, research methods, managerial economics and strategy. The modules devoted to Korean topics apply the general modules to the region in question, and give the programme specialist interest.
--

III. Programme Learning Outcomes: What will you learn on the programme?

There are four key areas in which you will develop:

<p>Learning Outcomes: Knowledge</p> <p>This programme aims to provide students with an understanding of international management and its sub-disciplines (accountancy, strategy, managerial economics, marketing and finance), specialist knowledge of management and finance in Korea and competence in Korean language. For example, having successfully completed the programme students should:</p> <ol style="list-style-type: none"> 1. have detailed knowledge of the various models and systems taught, and the underlying principles 2. understand the strengths and limitations of different techniques and critical methods 3. understand how the findings achieved by use of different managerial strategies, financial techniques and critical methods may be used to inform managerial decisions in different countries and organizational contexts 4. understand the limits and effectiveness of different managerial, financial and other regulatory systems 5. understand the different roles played by managers in different functions and cultures 6. understand how far factors associated with the global and local cultural (Korean) context influence decision-making within organisations 7. have knowledge and understanding of the Korean language/grammar (written and spoken) to a competent level
--

Typical Teaching Methods	Typical Assessment Methods
<ul style="list-style-type: none"> • Knowledge of theoretical and empirical analysis in international management is developed via weekly lectures and tutorials in which a particular topic is introduced and discussed. Students are guided in their reading and independent study on particular topics. In the accounting modules students also carry out exercises, while in the quantitative techniques module they learn how to use a statistical package and how to generate and interpret results. Lectures are led by an academic while tutorials offer students an opportunity to debate ideas, present their work and communicate. • The Korean language modules impart knowledge of Korean (spoken and written). 	<ul style="list-style-type: none"> • The assessment procedures involve coursework assignments, tests and unseen examinations. They provide students with opportunities to demonstrate their knowledge and understanding of the content and systems taught in lectures, tutorials and the literature.

Learning Outcomes: Intellectual (thinking) skills	
<ol style="list-style-type: none"> 1. explain and interpret concepts in these subject areas 2. understand theoretical models and their relevance in different cultural contexts 3. identify how far techniques, conventions and practice differ across cultures, and to show why 4. appraise and assess empirical analyses and evidence 5. interpret and critically assess the applications made of standard models in different cultural contexts 6. understand and utilise written and spoken Korean language to a competent level 	
Typical Teaching Methods	Typical Assessment Methods
<ul style="list-style-type: none"> • Lectures are led by an academic and their purpose is to provide a synthesis of the theoretical and empirical analysis on particular topics and to encourage students to think about key intellectual questions and issues in international management. Tutorials offer students an opportunity to debate ideas discussed in the lectures, to present their work, to problem solve and to learn via open discussion in small groups. Students are encouraged to develop their own thinking on topics based on readings, lectures and class discussions. The theoretical material in the module encourages the development of analytical and conceptual skills, while the more applied and empirical subjects develop students' ability to apply techniques and assess empirical data and evidence. • The language modules encourage students to appreciate language structure, grammar 	<ul style="list-style-type: none"> • Coursework and written examinations test students' ability to use data and analytical models to inform managerial decisions/strategies. The assessment procedures also test their knowledge of Korean grammar and language structure.

and literature. The assessment procedures involve coursework assignments, tests and written examinations. They provide students with opportunities to demonstrate their intellectual skills.	
--	--

Learning Outcomes: Subject-based practical skills	
<ol style="list-style-type: none"> 1. construct and apply models, systems, and techniques 2. interpret financial statements and accounts of businesses and other organisations 3. apply different conventions and techniques to construct financial statements, accounts and reports 4. explain how models learned in the programme may be used to inform managerial decisions in different countries and organizational contexts 5. asses and appraise models, systems and techniques taught in the programme 6. use statistical techniques and computer software 7. speak and understand Korean language to a reasonable level of competence 	
Typical Teaching Methods	Typical Assessment Methods
<ul style="list-style-type: none"> • The programme offers students the opportunity to develop practical skills including: the ability to use library-based databases to carry out literature searches; reading and synthesis skills; essay writing skills; accounting methods and techniques; use of a statistical package and quantitative and qualitative techniques. The tutorials, coursework and examinations encourage students to demonstrate their knowledge and understanding of the theoretical and empirical content and to appreciate the contours of debate in management science. In the Quantitative and Analytical Techniques module, almost half the tutorial hours are held as computer lab sessions. In the accounting modules unseen written examinations test the students' ability to inform decision-making on the basis of data and analytical models taught in the classroom and the literature. • In the language module students learn to speak, listen, read and write in Korean. Each module requires a weekly commitment of three hours to attend lectures and tutorials, for the remainder of the time students are encouraged and expected to undertake substantial preparation by reading about the topic, carrying out exercises and preparing for tutorial discussions and language classes. The dissertation requirement aims to develop an awareness of how the basic 	<ul style="list-style-type: none"> • Practical skills are assessed via coursework assignments, tests and written and oral examinations.

content and principles can be transferred in different industries and global applications.	
--	--

Learning Outcomes: Transferrable skills	
<ol style="list-style-type: none"> 1. participate in the labour market at degree level 2. solving actual problems in the workplace 3. acquiring the experience and additional skills needed for entry to further academic study 4. acquiring the experience and additional skills needed for entry to specialised professional training 5. estimate the extent to which the skills learned can be transferred between different organisations, and to make any modifications necessary 6. estimate the extent to which the skills learned can be transferred between economic and cultural contexts, and to make any modifications necessary 	
Typical Teaching Methods	Typical Assessment Methods
<ul style="list-style-type: none"> • Students are taught to develop their ability to think from first principles, to analyse different management contexts and to problem solve. Small group teaching via tutorials encourages communication skills and teamwork. The accounting modules develop numeracy skills and the ability to apply financial techniques, while the quantitative techniques module shows students how to use statistical software and how to generate and interpret empirical results. Written communication skills are enhanced via essay writing and the independent study project (dissertation). The programme provides students with opportunities to apply their understanding of management and finance to various organisational and cultural contexts – in particular in Korea. • The language modules teach students to speak, listen, read and write in Korean. 	<ul style="list-style-type: none"> • Transferable skills are assessed via coursework assignments, tests and written and oral examinations.
