Incipit, from SB I catch-line:

G₄ vi 3' [] a-š[ib]

The text proper begins after a gap of about 25 lines, as calculated from the curvature of MS bb. Line numbering is provisional accordingly.

MS X lacks a further 5 or 6 ll. to the end of its col. i. Probably here are to be placed the ends of the last 7 ll. of col. i of MS k, overlapping with the beginning of MS X, col. ii:

56 k i 1' []-ni

There follows a gap of perhaps 30 lines or more, near the end of which must be placed MS z, col. ii:

z	ii 1'	ʿLUGAL ¹ []
z	ii 2'	DAM []
z	ii 3'	ʿù ¹ []
z	ii 4'	x []

Henceforward the line numbering relies on an estimate of 58 lines for col. i of MS X (although the figure is likely to be lower in later columns), and the presence of decimal markers in the margins of the same MS.
