Programme specification 2012/2013

School of Oriental and African Studies

The following information forms the programme specification at the School of Oriental and African Studies, University of London. It gives definitive information relating to a programme of study and is written for a public audience, particularly prospective and current students. It is also used for other purposes such as initial programme approval, and is therefore produced at the start of the programme development process. Once approved, it forms the baseline information for all statements relating to the programme and is updated as approved amendments are made.

WHY CHOOSE THIS PROGRAMME?

Why study at SOAS?

SOAS is unique as the only higher education institution in the UK specialising in the study of Africa, Asia and the Middle East. The School also has the largest concentration of specialist faculty concerned with the study of these areas at any university in the world. SOAS is consistently ranked among the top higher education institutions in the UK and the world and it also offers a friendly, vibrant environment for students in a diverse and close-knit community.

What is special about this programme?

This programme offers students the opportunity to study Japanese culture in-depth, along with the study of Japanese language. The programme prides itself in having a broad range of expertise in Japanese subjects across the School. If you want to learn about culture/society in depth and study some Japanese language, as well as study a particular discipline, then this programme offers you many opportunities. We have experts and course offerings in traditional Japan and
in contemporary Japan including the popular arts, as well as politics and economics. In the most recent national assessment of university research, the Japan and Korea Department was rated, with other Asian Studies Departments at SOAS, as the number one centre for research on Asia.

Who would it suit? This course is aimed at those who are fascinated by Japanese culture and want to understand it deeply, but who do not want to study Japanese language intensively, and who want to focus on various aspects of Japanese society, culture, politics, etc. in depth. Students with no former knowledge of Japanese and those with advanced knowledge are encouraged to apply. It is for students who want to be challenged to achieve. The range of expertise in Japanese at SOAS offers specialists in almost all humanities and social science areas. Our students follow a wide variety of career paths, and many spend time after graduation in Japan and/or working in areas related to Japan. The range of career options open to graduates is vast. Besides those who go into research, many graduates use their subject directly in subsequent employment. Examples include journalism, business and commerce, teaching overseas, the Civil Service (especially the Foreign Office), or NGOs. Our recent graduates have also gone into banking, marketing, law, and one worked with a rock music promotion company in Japan, and then became a patent lawyer, now also working with Japanese clients in London.

Programme structure You will study Japanese language and Japanese subjects of your choice, from a list of Japan-related units from a wide range of disciplines. The final year you will also work on an Independent Study Project on some aspect of Japan.

Assessment summary Courses will be assessed in a variety of ways. Some are assessed by essay or coursework only; others will have a mixture of coursework and final exam assessment.

**TEACHING, LEARNING AND ASSESSMENT**
What methods will be used to achieve the learning outcomes?

Knowledge
- Acquisition of 1, 3 and 4 is through small-group classes, tutorials, regular assessed and non-assessed coursework.
- Acquisition of 2 is through courses taught in another department at SOAS. These can be large lecture courses or small-group classes.
- Acquisition of 4 is through lectures and practical exercises, as well as through dedicated courses in culture and linguistics at various levels.

Assessment:
Testing of the knowledge base is through:
- written examinations, typically containing both seen and unseen elements;
- oral examinations;
- assessed coursework;
- assessed library assignments;
- essays

Intellectual (thinking) skills
- Intellectual skills are developed through the teaching and learning programme outlined above. Each course involves discussion of key issues, practice in applying concepts both orally and in writing, analysis and interpretation of materials, and individual feedback sessions for learners on work produced.

Assessment:
Assessment of intellectual skills (oral presentation, participation in classroom discussion, essay writing) is typically reflected in a 40% “coursework mark” for upper level courses in literature and linguistics.

Subject-based practical skills
The programme aims to help students with the following practical skills:
1. Retrieve, sift and select information from a variety of sources
2. Plan, undertake and report both bibliographically-based and fieldwork-based research
3. Understand, speak and read modern Japanese at a basic level of proficiency

Transferable skills
The programme will encourage students to:
1. Adopt a non-eurocentric perspective and foster intercultural awareness and understanding
2. Structure and communicate ideas effectively both orally and in writing
3. Participate constructively in groups
4. Work independently
5. Find information and use information technology
6. Be self-reliant
7. Assess the relevance and importance of the ideas of others

Skills 2, 4, 5 and 7 are typically learned in the process of carrying out research assignments (coursework, essays etc.) as well as during classroom discussions.

Assessment:
Assessment of 1, 2, 4, 5 and 6 is through various types of coursework and research
REFERENCE POINTS
What has been the basis for the design of this programme?

The following reference points were used in designing the programme:
- School Learning and Teaching Strategy
- Staff research
- QAA framework for higher education qualifications
- QAA subject benchmark statement Languages and related studies (2007)

1. The programme provides a basic standard of active and passive competence in the use of the language. The programme also caters to the needs of non-beginners and/or heritage students.
2. Explicit knowledge of language is covered by specific upper-year courses as well as by a first-year course in Language Learning.
3. The programme clearly provides knowledge of aspects of the cultures, communities and societies where the languages are used, as well as subject-related skills. This is done through survey courses in the first year, as well as through reading (or viewing) and analysis of literary and other cultural materials in later years.
4. The programme actively promotes the adoption of a non-eurocentric perspective and intercultural understanding. The staffing of the Japanese section, with scholars from Japan, Britain, Germany and Italy, educated at universities in Asia, Europe and the United States, in itself is a model of intercultural understanding, and guarantees that the students are provided with diverse and sometimes conflicting perspectives, as should be the aim of any university education.

QUALITY ASSURANCE AND ENHANCEMENT
SOAS has internal procedures to assure the quality of provision to be offered to students and to enhance the quality in the light of experience following delivery, taking into account the input of external experts and students. The procedures are set out in the School’s Quality Assurance Handbook and can be viewed at [http://www.soas.ac.uk/add/qualityassurance/quality-assurance-handbook/](http://www.soas.ac.uk/add/qualityassurance/quality-assurance-handbook/).

SOAS is also subject to periodic external review from bodies such as the Quality Assurance Agency for Higher Education and relevant professional and statutory regulatory bodies.

The procedures described in the Quality Assurance Handbook are in place to provide a high quality student experience for those choosing to study at SOAS, and student input and evaluation of their experiences is greatly valued. Students make an input to the ongoing development of their programmes, and the environment in which they operate, in a number of ways, including:
- formal student evaluation as part of the annual programme review;
• student representation on School committees at various levels (through the Students’ Union) where many relevant issues are discussed.
